POOL CHEMICALS

POOL MAINTENANCE

IMAGE	CHEMICAL	DETAILS	APPLICATION	PACKAGING
	PH - DROP	Hydrochloric acid used to lower the pH or total alkalinity of swimming pool water. It can also be used as an acid washer for cleaning an empty pool. High pH in swimming pools causes calcium buildup on pool water line, water becomes dull or cloudy, clogs filter media, reduces effect of chlorine causing algae build up, causes irritation in eyes and itchy skin.	Water treatment and swimming pools	Liquid in 5litres and 20litres
	STAIN CONTROL	For removal of stains and scum that form on swimming pool walls	Swimming pool	Liquid in 5 Litres & 20 Litres
	ALGI-CONTROL	For control of algi growth in swimming pools	Swimming pool	Liquid in 5 Litres & 20 Litres
	SUPA TOUCH	For improvement of pool sparkle	Swimming pool	Liquid in 1 Litre
