

**EDOL-PLAV & DELTA PAV**

**EDOL-SPLC & DELTA SPLC**

**EDOL-MP204 & DELTA MP204**

The TAW EDOL control panels are designed for control and protection of both single and 3 phase motors. They are especially suitable for borehole submersible pumps and surface pumps. They incorporate control and protection features as detailed on the table below and include provision for float switch and pressure switch

**KEY**

- EDOL** - Electromechanical Direct online
- P**- Phase loss sequence/Low voltage relay
- L**-Low water level cut out relay
- A**- Ammeter
- V** - Voltmeter

MODEL	FEATURES
<b>EDOL-PLAV</b>	Electromechanical DOL control panels with Metal Enclosure fitted with phase protection relay, Dry run protection relay, ammeter and Voltmeter SUITABLE FOR BOREHOLE PUMPS
<b>DELTA-PAV</b>	Electromechanical DELTA control panels with Metal Enclosure fitted with phase protection relay, Dry run protection relay, ammeter and Voltmeter SUITABLE FOR SURFACE PUMPS ABOVE 4KW
<b>EDOL-SPLC</b>	Electromechanical DOL control panels with Metal Enclosure fitted with SPLC CONTROLLER which incorporates protection against phase loss, low & high voltage, Motor sequence, Dry run and motor overload. The unit has an LCD display screen that shows pump operating status which makes it quick and easy to detect fault. SUITABLE FOR BOREHOLE PUMPS
<b>DELTA-SPLC</b>	Electromechanical DELTA control panels with Metal Enclosure fitted with SPLC CONTROLLER which incorporates protection against phase loss, low & high voltage, Motor sequence, Dry run and motor overload. The unit has an LCD display screen that shows pump operating status which makes it quick and easy to detect fault. SUITABLE FOR SURFACE PUMPS ABOVE 4KW
<b>EDOL-MP204</b>	Electromechanical DOL control panels with Metal Enclosure fitted with Grundfos MP204 which incorporates protection against phase loss, low & high voltage, Motor sequence, Dry run and motor overload. The unit has a Digital display screen that shows basic pump operating status which can be analysed further using the Grundfos remote management software. This is available on request at extra cost. SUITABLE FOR BOREHOLE PUMPS
<b>DELTA-MP204</b>	Electromechanical DELTA control panels with Metal Enclosure fitted with Grundfos MP204 which incorporates protection against phase loss, low & high voltage, Motor sequence, Dry run and motor overload. The unit has a Digital display screen that shows basic pump operating status which can be analysed further using the Grundfos remote management software. This is available on request at extra cost. SUITABLE FOR SURFACE PUMPS ABOVE 4KWS
